Seaducer started designing mono boats in 1988. We have over 30 years of combined experience in designing record setting monos. The New SD3 Hull Technology is one the fastest and best handling monos in the world. In 2006 the SD3 60/80 mono ran over 93 MPH. All the monos are made of space age materials, such as Carbon Fiber and the finest resin on the market. This is to achieve a lighter but strong racing hull. We are constantly improving the design to achieve faster and better handling monos. This is proven by our many world championship monos from all over the globe.
